

IMPORTANT: Shawnee & Evergreen residents

Cardel/Genstar has announced that starting August 2017, they're going to cut trees, strip the top soil and grade the entire rest of the old golf course. It could be another two to three years before the land is developed.

The Shawnee Evergreen Community Association (SECA) has asked that Cardel/Genstar wait to clear the land until closer to construction, out of respect for the residents. Along with losing lovely trees, green space and wildlife years earlier than necessary, residents will experience terrible dust. This has been a major issue in parts of the golf course already under construction.

Despite SECA's request, Cardel/Genstar is moving full steam ahead with their plans because it offers them cost efficiencies. Given the enormous impact this has on quality of life for residents, is this truly necessary? Could they not wait?

Cardel/Genstar pride themselves in being family-oriented and community-minded. Let's encourage them to be a good neighbour, too. Please email the individuals below* and let them know that Cardel/Genstar should wait.
